

What is a vision statement?

The vision statement should be a clear and inspiring description of what the subject aims to achieve in the future. It's like a guiding star—defining aspirations and setting a long-term direction. Think of it as answering the question: "Where do we want to go?" It's meant to be ambitious, motivating, and forward-thinking.

Guiding criteria:

- Makes clear what is unique to the subject
- Reflects the key drivers in the context of that subject
- Is focussed on the essence of the subject
- Future focussed

Vision statement

Scientific Studies is a student-focussed subject that provides flexibility to inspire curiosity and agency, empowering students to shape their future educational, community, and career pathways.

It provides opportunities for students to work collaboratively in authentic and meaningful ways to strengthen science inquiry skills and develop a critical understanding of scientific ways of knowing and thinking about the world through investigating applied, real-world contexts.

Graduates of Scientific Studies will be equipped to apply science inquiry skills and scientific reasoning creatively to real-world issues, diverse pathways and emerging challenges.

NB: as Subject Renewal Groups (SRGs) progress through the Subject Renewal process, plans and documents will be further refined and updated.
