

Accessing Results Reports on Results Release Day

To provide the results reports to schools in a timely manner, the SACE Board have made some changes to how reports will be delivered to schools on results release day. The Results Reports will be pre-generated and will be available for download in multiple formats from a pop-up window inside Schools Online.

The reports will still be accessed from the same location – select *Results Reports* from the **Reports** menu in Schools Online.

Reports have been pre-generated with the most universal selection criteria. When selecting a report to access, the selection criteria fields on the screen will be inactive, please press Go to continue.

A list of all available reports will open, and you can click to download the report(s) you require. Note that for some reports, multiple formats are available – simply click on your preferred format.
