

## **Continuous Improvement in SACE Assessment and Quality Assurance**

At the beginning of each calendar year SACE Board staff in collaboration with school leaders, teachers and SACE Coordinators, review the previous year's results cycle with a view to continuous improvement.

The following table outlines some of the main improvements suggested from the internal review of the 2011 results cycle. Many of these have already been implemented.

| own internal process.  Align moderation of the Research Project with other subjects, requiring only sample of student work rather than the submission of all student work.  Discontinue the digital submission/upload of Assessment Type 3: Evaluation for Research Project B.  Ensure the length of a 'moderation day' is similar to the length of a usual teaching day.  Identify aspects of DATEX Online for improvement and consult with school on the priorities for implementation.  School Assessment  Extend training and support for moderators and supervisors.  Change the sampling process to sample from each assessment type, and a A+ work from each assessment type, without increasing the overall number of samples schools need to submit.  Implement enhanced moderation procedures for A+ work samples.  Provide advice to schools to assist in using moderation feedback.  Research the potential benefits and impact of electronic submission of schemassessment results.  Implement additional benchmarking activity for all investigation markers.  Implement improved procedures for resolving differences between markers of external investigations. | Area    | 2012 Improvements  |
|--|---------|--|
| final result sheet is now optional, potentially reducing teacher input time. Note: the school assessment grade calculator can still be used for a school own internal process.  Align moderation of the Research Project with other subjects, requiring only sample of student work rather than the submission of all student work.  Discontinue the digital submission/upload of Assessment Type 3: Evaluation for Research Project B.  Ensure the length of a 'moderation day' is similar to the length of a usual teaching day.
